

Appendix B
Table 2
December Groundwater Analytical Results

Table with columns: Inspection Date & Well, Region, Station, Remarks, Results, Remarks, and numerous sub-columns for various parameters like Coliforms, Bacteria, and Chemicals. Includes summary rows for 100-NMCP 2016 and 100-NMCP 2018.

See 100-NMCP
#1 National compliance generally < 0.01 mg/L
#2 Not specified, positive value > 0.0001, can have persistence effect.
#3 Qualitative value calculated by dividing numeric value by 1000 (range 0-3 mg/L to indicator weight 3-250/1000)
#4 Qualitative value calculated by dividing numeric value by 100 (range 0-10 mg/L to indicator weight 10-100/100)

Data Summary
#1 Quantification of these and bacterial hetero has been conducted via single total impregnation using the intensive response factor for the corresponding lines/batched conduct.
